User interface AutoCAD has a familiar two-panel interface, with a 2D drawing area on the left and a 3D viewing area on the right. In AutoCAD 2007 and later, the 2D area is on the left, with a panning window that can be dragged to cover the right area of the screen. By default, the user is in the 2D drawing area and must click the user-definable ribbon button, the "Ribbon" button (), in order to go to the 3D view

(default with the ribbon down). AutoCAD contains a menu bar with shortcuts to commonly used functions and menus. Functions are labeled with the corresponding letters of the alphabet on the ribbon. Users can organize the commands into folders and assign keyboard shortcuts. The ribbon provides a shortcut for each command. For example, the letters X, Y, and Z are assigned to the commands "Select," "Move," and "Scale." Additionally, the F-keys are assigned to commands on the ribbon, so that F1 will take the user to the Help window. By default, the drawing area has a working space of, and a user can save additional space by hiding the annotation bar or by simply avoiding the toolbars. The 3D workspace is provided with a grid, and the ViewCube is displayed. By default, the drop-down menus in AutoCAD also open in the ribbon. As with other software, different applications can allow users to customize the user interface to make AutoCAD easier to use for a particular task. Geometry Geometry is defined as an abstract description of a three-dimensional object. AutoCAD enables users to create and modify geometry via the drawing and edit tools. A drawing contains objects that are composed of points (vertices), lines (edges), and surfaces (faces). Three-dimensional objects such as houses, cars, and ships can be defined by points, lines, and surfaces. Objects in 3D space can be combined or separated. A book, for example, is a solid object, and a cover is a surface. The surface of a book can be separated from the book to expose the

pages, which can then be cut, folded, stapled, or taped. Drawings are visualizations of geometry, not actual representations of physical objects. In 3D, the objects are defined by coordinates, and a 3D object is ca3bfb1094

Washington (CNN) While President Donald Trump has avoided directly criticizing his former attorney Michael Cohen, the latest developments in his legal troubles could prompt him to do so. Cohen, who pleaded guilty Tuesday to lying to Congress in 2017 about the length of his conversations with Trump about plans to build a Trump Tower in Moscow, is scheduled to begin a three-year prison sentence next month. And he's talking, apparently, about the president. On Tuesday, Cohen told the court that Trump and he lied about the length of their talks about the project. "I am no fan of Donald Trump. I am not," Cohen said in Manhattan federal court. "And I will always defend my family, myself, my country, and my God against injustice." Cohen later told the court he felt "shame" and "remorse" for his actions. The President's lawyer, Rudy Giuliani, said the notion that Trump lied in his written responses to lawmakers is "crazy." "Michael Cohen doesn't know me well enough to know that he's not lying," Giuliani said. "He's not my client and I'm not his lawyer." Trump has been widely criticized for his written responses to lawmakers' questions about his contacts with Cohen and Cohen's legal woes. In 2018, he told the House and Senate Intelligence Committees that he had "no" contacts with Cohen after Cohen's October 2017 letter to Trump's lawyer and fixer Rudy Giuliani said Trump had. On Wednesday, Trump tweeted that

he was being treated "so unfairly by our Country's leading Law Enforcement, the FBI" and that Cohen should "flip" and "tell the truth." Despite what you hear in the Fake News Media, I never "agreed" to do "things" related to the Campaign. ($250,000) The minor "Campaign" reporting violations were done by a third party that is not me, and they were easily resolved. I never knew of nor agreed to anything having to do with Collusion with Russia or the phony, illegal Witch Hunt by the Democrats. ($35,000) — Donald J. Trump (@realDonaldTrump) December 26, 2018 Speaking to reporters at the White House on Wednesday, Trump said, "So you've heard that they want to give a dui to Michael Cohen. Is he going to do it? Because Michael Cohen has great information. He knows about -- it's been already reported that he knows about things that haven't been
