To explore the management of partial thickness scapular fasciotomy scar. Twenty patients with partial thickness scapular fasciotomy scar were analyzed retrospectively. Eight of them were treated with surgical reparation, eight patients were treated by denervation. The severity and duration of the scar were assessed, and the patients were followed-up for 12 months. The 5th - 7th day after scapula denervation, the scar was almost invisible. The reparative tissue was similar to that of normal fascia. The appearance and severity of the scar were all improved. After 12 months of follow-up, the appearance of the scar was similar to that of normal fascia. The severity of the scar was obviously decreased. There were no statistical difference between the two groups. The fascia of scapular can be repaired by fascia of periscapular region. The denervation cannot improve the appearance of the scapular fascia scar.The BBC has taken an edgy approach to an already edgy murder story, as it re-launches its popular series 'Death in Paradise'. Starting from August 13, the show will follow the investigators of the Inspector Louis Le Guilloche unit in the Le Perquimau department in the Caribbean. The spin-off show will feature the African immigrants of the 0cc13bf012
