Dimension styles: Describe objects and lines using text as opposed to the graphic information described above. Text styles: Text information is described by a font, the text's height, placement, the text's width, and a few other parameters. Block styles: The building blocks of the drawing, they can represent shapes, lines, text, or anything else. Block properties: They can contain a large amount of information about the blocks. Group blocks: They can contain a number of blocks. A group is a container for many blocks of information. They can also contain text, dimension styles, and a variety of other things. Q: Is there a Drupal module to auto-generate a website/subdomain for a given user/domain? I'm working on a site where users will have their own domain name (mysite.user1, mysite.user2, etc.) and a Drupal website is generated automatically for them. Is there a module that will do this? A: Yes, Domain Access and Domain Access Roles should be able to do what you need. Domain Access requires that you define a domain first, but it should give you enough to get started. Q: How do I delete a worksheet? I have some code that dynamically creates a worksheet from a template. The user can then enter data into this sheet using a form and the template sheet. I have been told that if the user adds more than one worksheet to the workbook then the application cannot find the sheet. I've been looking for how to delete a worksheet but can't seem to find the correct method. I'm writing this in VBA. A: Delete the Worksheets Collection: Set myWorksheets = ThisWorkbook.Sheets ThisWorkbook.Sheets.Remove (myWorksheets(0)) This should work for you. A: Just do: Application.Sheets.Delete A: Use Worksheets.Add from a module/code. You can always delete by using Worksheets.Delete. I use a simple index value counter to look up the worksheets, and it works just fine. Here's an example: Sheets(2).Select Sheets(2).Delete The mid-season one-year deal has been criticized as a loophole that gives the league the ability to suspend players without pay during the offseason, but the idea of providing a steady stream of revenue throughout the year is appealing to the owners.
