I'm encountering this problem where I'm unable to import any module/components from the project. Error:(36, 13) Cannot download Gradle plugin. Plugin 'idea' is not a project plugin I've tried cleaning and rebuilding projects, restarting the ide, updating, and forcing the system to use new versions of gradle, but the problem still persists. A: I've encountered this problem as well. It has to do with the shadow plugin. You can install the shadow plugin in IntelliJ via Settings | Plugins -> Install plugin from disk... Then simply restart IntelliJ and try again. Lithographs of film, film with a thermoplastic adhesive layer, and various electronic, mechanical, and optical components are known. These items are useful for applying artistic and decorative effects, as well as the creation of perceived three-dimensional images. For example, it is known to apply a liquid photopolymer to a lithographic printing plate and then expose the plate to light through a lithographic film containing a corresponding image (or through an emulsion of the liquid photopolymer) to thereby form a relief image on the photopolymer. To achieve a three-dimensional image, multiple plates can be stacked one over the other to form a composite plate, in order that various cross-sections of the image may be formed. Reference
