Apr 06, 2018The effects of a multicomponent intervention program on risk indicators for hazardous alcohol use, and depressive symptoms, in adolescent girls. Results from two previous studies demonstrated that a multicomponent intervention program for adolescent girls decreased risk factors for alcohol-related problems, such as drinking or driving (N = 1,045), and depression (N = 1,215), compared to controls. This evaluation examined the effects of the program on pregnancy and violence among participants. Logistic regression models examined the rates of pregnancy and violence before and after treatment. Findings suggest that the intervention may have helped these participants avoid pregnancy and violence. Compared to controls, intervention participants were more likely to have had a valid pregnancy test (OR=2.26, pQ: How to test a inherited file share function I have the following FileShare function which I would like to test: public static void CopyFile(string sourceFile, string destinationFile, string folderPath, string username, string password) { if (
